## web developer

### WORK EXPERIENCE

**Intern at IT Engineering Factory** • Yaounde, opposite Polytech • Internship • 05/2023 – 10/2023  
**frontend developer**

Beyond the technical aspects, my internship was fueled by a genuine passion for creating user-centered experiences. I actively participated in creating a landing-page where I honed my problem-solving skill, collaboration, communication. This passion continues to guide me as I seek to contribute to innovative and impactful web development projects.

### PROJECTS

#### **A Food delivery website**

11/2023 – 11/2023

Here's a food delivery app which can possibly solve the problems faced with local food deliveries.

The technologies used are React, ChakraUI and TailwindCSS

React : For making development easy and resusability of components,

REST API : For creating a set of data structures for the dishes,

TailwindCSS : For flexibility,

ChakraUI : For reusable UI components

#### **A travel Agency website**

10/2023 – 10/2023

It's a scalable website with various web pages linked together using the react-dom.

The technologies used are React, ChakraUI and TailwindCSS

React : For making development easy and resusability of components,

REST API : For creating a set of data structures for the dishes,

TailwindCSS : For flexibility,

ChakraUI : For reusable UI components

My purpose for creating this project is to solve the problem of reservations in our travel agencies.

### SKILLS & INTERESTS

basic AWS cloud services (EC2, basic Docker, ChakraUI, CSS, Expressjs, Figma, Git, Github, HTML, lambda),  
Netlify, Nodejs, React, Redux, REST API's, Tailwindcss, Vite, Beautiful websites

### CERTIFICATIONS

**Pinciples of UI/UX design**

UDEMY • 10/2023 - 11/2023

**front end web development**

UDEMY • 05/2023 - 10/2023
